Manual del usuario

Please check local building codes regarding footings, location and other requirements before beginning construction. Study and understand this owner's manual of important information and helpful tips for easier and more enjoyable assembly.

Assembly instructions:

Reviewing all instructions and the appropriate information before you begin, make sure following the step sequence carefully for successful results.

Flooring base:

A good location for the storage building is a square and level area with good drainage.

A strong plastic sheet (thickness: at least 150µm) should be placed under the foundation to assist in reducing rising dampness from the soil, thus reducing condensation build up in the shed. Your storage building must be anchored to prevent wind damage. Once secured, it is highly recommended applying silicone along the inside of the base rail to minimize condensation.

Parts and Parts List:

Before you start, separate and identify all the parts and hardware to be sure that you have all the necessary parts for your building (refer to the Parts List Page).

If you find that a part is missing, please notify the seller within one week after receiving the product. Do not attempt to assemble the building if parts are missing because any building left partially assembled may be seriously damaged by light winds.

(Please tear off the safety protection layer before the assembly, keep the part number label if needed)

Safety must be put in the No. 1 position:

- 1 Select a dry and calm day for your assembly. Team works (Two or more people) are required during the assembly;
- 2 Wearing safety gloves, eye protection and long sleeves during the assembly to prevent injury; Pay attention to the sharp edge of some parts;
- 3 Children and pets are not allowed entering into the construction site;
- 4 Never concentrate your total weight on the roof of the building. When using a step ladder make sure that it is safety;

Care & Maintenance:

- 1 Keep the shed clean with soft cloth, use water if necessary;
- 2 Keep the door tracks clear of dirt and other stuff that prevent them from sliding easily.
- 3 Clean the snow with necessary tools to make sure it is safe to enter into; Heavy snow may cause collapse, please make sure safety before entering into.
- 4 The shed is not made for living but storing stuff.
- 5 Please add some oil on the top and bottom door sliding channel to make door slides smoothly.

Manualul utilizatorului

Vă rugăm să verificați normele locale de construcție referitoare la fundații, amplasare și alte cerințe înainte de a începe construcția. Citiți și înțelegeți acest manual al proprietarului, care conține informații importante și sfaturi utile pentru o asamblare mai ușoară și mai plăcută.

Instrucțiuni de asamblare:

Înainte de a începe, citiți toate instrucțiunile și informațiile relevante și asigurați-vă că urmați cu atenție pașii pentru a obține rezultate satisfăcătoare.

Baza pardoselii:

O locație bună pentru un depozit este un teren pătrat și plat, cu un sistem de drenaj bun.

Sub fundație trebuie să se așeze o folie de plastic rezistentă (grosime: cel puțin 1,50 μm), care va ajuta la reducerea umidității provenite din sol și, astfel, va diminua acumularea condensului în magazie. Clădirea de depozitare trebuie să fie ancorată pentru a preveni deteriorarea cauzată de vânt. După fixare, se recomandă aplicarea de silicon de-a lungul marginii interioare a șinei de bază pentru a minimiza condensul.

Piese și lista pieselor:

Înainte de a începe, separați și identificați toate piesele și componentele hardware pentru a vă asigura că aveți toate piesele necesare pentru construcție (consultați pagina cu lista pieselor).

Dacă constatați că lipsește o piesă, vă rugăm să anunțați vânzătorul în termen de o săptămână de la primirea produsului. Nu încercați să asamblați construcția dacă lipsesc piese, deoarece orice construcție lăsată parțial asamblată poate fi grav deteriorată de vânturi ușoare.

(Vă rugăm să îndepărtați stratul de protecție înainte de asamblare și să păstrați eticheta cu numărul piesei, dacă este necesar).

Siguranța trebuie să fie pe primul loc:

- 1 Alegeți o zi uscată și calmă pentru asamblare. Asamblarea necesită lucrul în echipă (două sau mai multe persoane).
- 2 Purtați mănuși de protecție, ochelari de protecție și mâneci lungi în timpul asamblării pentru a preveni rănierea; Acordați atenție marginilor ascuțite ale unor piese;
- 3 Copiii și animalele de companie nu au voie să intre pe șantier;
- 4 Nu vă concentrați niciodată greutatea totală pe acoperișul clădirii. Când utilizați o scară cu trepte, asigurați-vă că aceasta este sigură;

Îngrijire și întreținere:

- 1 Păstrați magazia curată cu o cârpă moale, folosiți apă dacă este necesar;
- 2 Păstrați șinele ușii curate, fără murdărie și alte obiecte care împiedică alunecarea ușoară a acestora.
- 3 Curățați zăpada cu unelte necesare pentru a vă asigura că puteți intra în siguranță; zăpada grea poate provoca prăbușiri, vă rugăm să vă asigurați că este sigur înainte de a intra.
- 4 Șopronul nu este destinat locuirii, ci depozitării obiectelor.
- 5 Vă rugăm să adăugați puțin ulei pe canalul de glisare al ușii, în partea superioară și inferioară, pentru a asigura glisarea ușoară a ușii.
